Set Your Mind Free.™

Educational Breakthroughs provides a model of one-to-one instruction for students who need targeted intervention with their studies. Our intensive approach places special emphasis on:

- **Identifying strengths** and weaknesses in light of a student's academic needs
- **Expert assistance** with subjects using student's textbooks and supplemental materials
- **Implementing strategies** that capitalize on individual learning styles
- **Improving study skills** through enrichment or remedial instruction
- **Supporting learning differences** for students who have special needs

Accountability is established through open communication between the student, their family, and their classroom teachers. Our teaching techniques have typically proven to be successful where the traditional subject-only approach has not worked.

Students gain confidence and succeed in their subjects as they learn to balance their studies and make their study time more effective. This enables the students to reach their academic potential.

Our unique service has an established track record of offering effective instruction by experienced professionals. In addition to tutoring traditional subjects, our reading specialists and learning support specialists offer diagnostic testing, written evaluations, individualized plans, and follow-up recommendations.

For those students who have further learning challenges, more advanced resources are available for consideration:

- *Educational Therapy* is specifically designed to stimulate the brain's ability to organize, interpret, and recall information. This brings order to learning material, and eliminates much of the confusion that students may experience in life.
- *Remedial assistance* with math and reading to address today's academic standards of measuring student achievement.
- *Our network* of doctors and counselors are available to work along side school officials where medical or psychological intervention may be needed.

**Together, we can
make a difference.**

ClassroomPlus
Pennsylvania's Math & Reading Tutoring Program

*An approved ClassroomPlus Provider.
Grant money available to those who qualify.*

Our students are saying...

"Getting A's and B's on my report cards was something I never thought I could do...I have a lot more confidence in myself and I feel like I can achieve anything I set my mind to."

"I have brought up my math and english grades as well as my science and history grades..."

"I don't dread going to school anymore. I am now getting A's and B's..."

"I have improved my study habits. I am learning to become organized with my folders, notebooks, taking notes, and completing homework assignments..."

**Contact Educational
Breakthroughs today to get back
on track with what just might be
the breakthrough of your lifetime.**

Deborah L. Petersen, M.Ed.
Executive Director

Deborah Petersen is an accomplished educator with over twenty years of teaching experience, including both classroom and private instruction.

Mrs. Petersen received her Bachelor of Science in Education from Messiah College. She has completed training as an Educational Therapist from the National Institute of Learning Disabilities (NILD) in Norfolk, VA. She earned her Masters of Education in Teaching and Curriculum Design and a Pennsylvania Reading Specialist Certification from Pennsylvania State University.

The difference is 1-to-1 instruction
